TRANSPORTATION MANAGEMENT SYSTEM

USING MERN STACK

The Transportation Management System (TMS) implemented using the MERN stack revolutionizes the way transportation logistics are managed. With its role-based access control and streamlined user registration process, the TMS offers a comprehensive solution for administrators and users alike. By leveraging MongoDB, Express.js, React.js, and Node.js, the system ensures efficient data management and seamless communication between client and server components. the TMS enhances decision-making capabilities and optimizes transportation allocation, ultimately improving overall efficiency and productivity in transportation operations.
